THE CURRENT SITUATION

Preliminary estimates for the
United States, January-June 1947

In the first six months of 1947, farmers received around 11.7 billion dollars from farm marketings, about 30 percent more than last year. When Government payments are included, total cash receipts were nearly 12 billion dollars, 25 percent above 1946.

Receipts from livestock and products rose to about 7.9 billion dollars, nearly 40 percent more than a year ago. Higher prices and increased marketings accounted for a 60 percent gain in receipts from meat animals during the first half of 1947. Cash receipts from dairy products increased about 30 percent over last year, although this gain, is reduced to 10 percent when dairy production payments are included in last year's receipts. Income from poultry and eggs in 1947 exceeded last year by 10 percent; sales were down but prices of all poultry products except turkeys were above last year. Receipts from crops in the first six months were about 3.8 billion dollars, 20 percent greater than in 1946. The largest gains were in grains and tobacco.

According to preliminary estimates, farmers received around 2.0 billion dollars from marketings in June, 30 percent more than a year ago. The percentage change is slightly less when Government payments are included. Receipts from livestock and products were nearly 50 percent greater than in June 1946. Income from meat animals was about twice as great as last year and dairy products and poultry and eggs were substantially above 1946. Increased cash receipts from feed crops were offset by decreased returns from fruits, and the total for all crops was only a little above the same month last year.

The increase in cash receipts in June over the same month last year is partly the result of an unusually small volume of marketings in June 1946. This was caused largely by the tendency on the part of producers to hold meat animals off the market last year in anticipation of higher prices in July.

State and Regional Estimates,
January-April 1947

During the first 4 months of 1947, cash receipts from farm marketings were about one-third higher than in the same period last year. The smallest gain was 12 percent in the South Atlantic Region, and the largest was 48 percent in the West North Central Region. Increases in receipts from cattle, hogs, and dairy products were important in all regions. Noteworthy gains were also made in receipts from eggs in the North Atlantic, East North Central, and West North Central Regions. Sharp increases in income from wheat occurred in the West North Central, South Central, and Western Regions. Significant increases were also shown in corn in the East and West North Central Regions, in cotton in the South Atlantic Region, and in apples in the North Atlantic Region.

In March all regions of the country showed substantial gains in cash receipts from farm marketings over the same month in 1946. The smallest increase was 24 percent in the South Atlantic Region and the largest was 60 percent in the West North Central. These gains resulted from increases both in livestock and in crops.

The gains in livestock and products ranged from 20 percent in the Western Region to 53 percent in the South Central. Increases in receipts from cattle, hogs, and wholesale milk were significant in the East North Central, the South Atlantic, South Central, and Western Regions. In the West North Central, greatest gains were made in cattle, hogs, and butterfat, while in the North Atlantic increases in income from wholesale milk, eggs, and cattle were most prominent.

Income from crops on the whole showed slightly greater gains than income from livestock. The smallest increase was 17 percent in the South Atlantic Region, and the largest was 107 percent in the West North Central. Principal gains were in tobacco in the North Atlantic, corn in the East North Central, wheat and corn in the West North Central, cotton in the South Atlantic, wheat and cotton in the South Central, and wheat in the Western Region.

In April, the gains in cash receipts over the same month in 1946 were generally not quite so great as in March. The increases varied from 7 percent in the South Atlantic Region to 58 percent in the West North Central. Income from livestock and products rose 30 percent above April 1946, with gains ranging from 20 percent in the Western Region to 39 percent in the West North Central.

Most important increases were in wholesale milk in the North Atlantic; in hogs, cattle, and wholesale milk in the East North Central, South Central, and Western Regions; in hogs and cattle in the West North Central Region; and in eggs in the South Atlantic Region. Crop receipts varied all the way from 5 percent below April 1946 in the South Atlantic Region to 190 percent above in the West North Central. Receipts from oranges in Florida showed a drop of 43 percent. This, together with a decline of 15 percent in income from truck crops in the South Atlantic Region as a whole, accounted for the 5 percent decline in total crop receipts in that region. A severe decline in receipts from strawberries, due to the late season, nearly offset the substantial increase in income from wheat in the South Central Region, resulting in a gain of only 3 percent for all crops. Sharp increases in receipts from wheat and corn were responsible for most of the gain in total crop receipts in the West North Central Region.

Footnotes for Table 6

- 1/ Sheep and lambs, turkeys, wool, beeswax, horses, mules, honey.
- 2/ Food grains, feed crops, soybeans, apples, other fruits, truck crops, dry edible beans, sweetpotatoes, legume and grass seeds, sugar crops, forest and nursery products.
- 3/ Sheep and lambs, broilers, chickens, turkeys, wool, beeswax, horses, mules, honey.
- 4/ Rye, buckwheat, barley, sorghums for grain, hay, cotton lint, flaxseed, tobacco, apples, other fruits, vegetables, legume and grass seeds, sugar crops, forest products, popcorn, broomcorn.
- 5/ Turkeys, wool, beeswax, horses, mules, mohair, honey.
- 6/ Rye, buckwheat, sorghums for grain, hay, cotton lint, soybeans, flaxseed, tobacco, apples, other fruits, vegetables, legume and grass seeds, forest, nursery and greenhouse products, popcorn, broomcorn.
- 7/ Sheep and lambs, turkeys, wool, bees, beeswax, horses, mules, honey.
- 8/ Food grains, feed crops, peanuts, soybeans, fruits excluding oranges, sweetpotatoes, legume and grass seeds, sugar crops, forest, nursery, and greenhouse products.
- 9/ Sheep and lambs, turkeys, wool, bees, beeswax, horses, mules, mohair, honey.
- 10/ Rye, rice, buckwheat, oats, barley, sorghums for grain, hay, peanuts, soybeans, fruits, potatoes, sweetpotatoes, mung beans, legume and grass seeds, forest, nursery and greenhouse products, popcorn, broomcorn.
- 11/ Broilers, chickens, turkeys, wool, bees, beeswax, horses, mules, mohair, honey.
- 12/ Rye, rice, feed crops, cotton lint, peanuts, flaxseed, fruits excluding oranges, dry edible beans, sweetpotatoes, dry field peas, legume and grass seeds, forest and greenhouse products, popcorn, broomcorn.

REVISED ESTIMATES FOR 1945 AND 1946

Cash receipts from farm marketings in 1945 are now estimated at 21.5 billion dollars and in 1946 at 24.5 billion dollars. Both estimates are a little higher than those previously published. Similar upward revisions also have been made in the estimates of volume of farm production for sale and home consumption. With Government payments included, total cash receipts in 1945 and 1946 amounted to 22.3 and 25.3 billion dollars respectively.

Comparability with other estimates

The revisions this year are more than routine annual revisions to take into account final reports from the States on production and sales of farm products. They allow for bench-mark adjustments in the level of production and sales on the basis of data collected in the 1945 Census of Agriculture. Such adjustments are necessary after the reports for each Census have been tabulated, and ordinarily involve some revisions in the basic data for the preceding 5 years. Necessary adjustments have not yet been completed, however, in estimated sales for crop years which affected cash receipts in the calendar years 1940-44. For this reason, previously published estimates of cash receipts in those years are still subject to revision and are not entirely comparable with the revised estimates for 1945 and 1946. However, the discrepancies are not likely to prove very large.

Another matter of some interest is the difference between the BAE estimates of cash receipts from farm marketings and the Census reports on the value of farm products sold. The BAE estimates have been consistently higher than the Census totals and the differences have resulted in a number of inquiries.

In the first place, it should be noted that the BAE estimates are on a full calendar-year basis, but the Census totals combine livestock and livestock products on a calendar-year basis with crops on a crop-year basis. While this is important, differences in approach and in the sources and methods employed by the two agencies are more basic.

The Census tabulates and reports the results of its enumerations. These enumerations are subject to errors of under-enumeration resulting from differences in the ability and diligence of the enumerators employed and from memory bias on the part of farmers interviewed. This is especially true of those dealing with less tangible matters like cash sales during the preceding year. The BAE estimates, on the other hand, are based on a great many different types of information in addition to the Census enumerations. They are computed, for the most part, from published reports of the Crop Reporting Board on production, disposition, and value of the various farm products. These reports are based on information from farmer cooperators and State agricultural statisticians, on livestock market reports, carlot receipts at principal markets, and other independent check data relating to the transportation, marketing, processing, and storage of farm products.

The BAE estimates are always checked in detail against Census reports. Whenever the Census figures appear more reasonable in the light of all the evidence at hand, the estimates are revised to Census levels.

The Census is probably most reliable for the simple counting of tangible items, such as livestock numbers on farms, or in cases in which the farmer may reasonably be expected to know the correct answer offhand. But for commodities like dairy and poultry products, which are produced and sold continuously or intermittently, the farmer who has not kept complete records may not remember all his sales during the preceding year, and there is no way for the enumerator to check. In such cases, the BAE estimates must rest more on other independent sources of information. Although a few of these sources are quite complete and reliable, the BAE estimates are more uncertain when the Census cannot be accepted as an accurate bench-mark. But in any event it should be clear, even from this brief discussion, why some components of the BAE estimates should tend to be larger than corresponding Census figures.

Cash receipts from farm marketings in 1945

According to the revised estimates, cash receipts from farm marketings in 1945 totaled 21,526 million dollars. (See tables 8, 10, and 12 for details.) The revised total is 3.6 percent larger than the previous estimate for 1945, published in the April 1946 issue of the Farm Income Situation. Changes in the estimates by commodity groups are summarized below:

	Previous estimate (Mil.dol.)	Revised estimate (Mil.dol.)	Percent difference
<u>Total</u>	<u>20,781</u>	<u>21,526</u>	<u>+3.6</u>
<u>Livestock and products</u>	<u>11,725</u>	<u>11,979</u>	<u>+2.2</u>
Meat animals	5,826	5,907	+1.4
Dairy products	3,070	3,063	-.2
Poultry and eggs	2,597	2,784	+7.2
Other	232	225	-3.0
<u>Crops</u>	<u>9,056</u>	<u>9,547</u>	<u>+5.4</u>
Food grains	1,313	1,525	+16.1
Feed crops	1,370	1,431	+4.5
Cotton (lint and seed) ...	1,034	1,199	+16.0
Oil-bearing crops	579	610	+5.4
Tobacco	954	898	-5.9
Vegetables	1,642	1,668	+1.6
Fruits and tree nuts	1,449	1,497	+3.3
Other	715	719	.6

The revisions have resulted in relatively little change for some commodity groups. Increases from meat animals and poultry and eggs are largely the result of upward adjustments in estimates of quantities marketed in line with Census and other data. On the other hand, substantial increases in the estimates for food grains, feed crops, and cotton are largely a reflection of the fact that more of the 1945 crops of wheat, hay, and cotton were marketed before the end of the calendar year than had previously been estimated. A downward revision in the total for tobacco results primarily from a revision in the estimated quantity marketed.

Cash receipts from farm marketings
in 1946

Cash receipts from farm marketings in 1946, according to revised estimates were 24,523 million dollars, 2.5 percent more than the preliminary total published in February on the basis of cumulative monthly estimates for 1946. (See tables 9, 11, and 13.) Because the upward revision for 1946 was a little smaller than for 1945, the increase of 13.9 percent in 1946 over 1945 is also a little less than previously reported. The revised estimates for 1945 and 1946 are compared below by commodity groups:

	<u>1945</u> (Mil.dol.)	<u>1946</u> (Mil.dol.)	<u>Percent change</u>
Total	<u>21,526</u>	<u>24,523</u>	<u>+13.9</u>
Livestock and products	<u>11,979</u>	<u>13,668</u>	<u>+14.1</u>
Meat animals	5,907	7,043	+19.3
Dairy products	3,063	3,716	+21.3
Poultry and eggs	2,784	2,681	-3.7
Other	225	228	+1.3
 Crops	<u>9,547</u>	<u>10,855</u>	<u>+13.7</u>
Food grains	1,525	1,677	+10.0
Feed crops	1,431	1,661	+16.1
Cotton (lint and seed)	1,199	1,496	+24.8
Oil-bearing crops	610	720	+18.0
Tobacco	898	954	+ 6.2
Vegetables	1,668	1,746	+ 4.7
Fruits and tree nuts	1,497	1,756	+17.3
Other	719	845	+17.5

Although the revisions have brought about some changes in the comparison for individual commodities, the general picture of 1946 cash receipts as compared with 1945 remains much the same as indicated and discussed in previous issues of the Farm Income Situation. The total volume of farm marketings in 1946 was about the same as in 1945, and increases in cash receipts were generally

the result of higher prices. Total crop receipts and total receipts from live-stock and products both showed increases of about 14 percent in 1946; and some increase was registered for all the major commodity groups except poultry and eggs, where a smaller volume of sales more than offset price increases.

Monthly distribution of cash receipts

Revisions in total cash receipts have resulted in part from changes in the estimates of total production and total sales for some commodities. But changes in the estimated monthly distribution of sales have also been significant in some cases. In order to provide a more accurate basis for comparison with preliminary monthly estimates in 1947, monthly estimates of cash receipts in 1945 and 1946, revised in line with the new annual totals, are presented in tables 14 and 15.

Government payments

Government payments to farmers, classified according to the various programs under which the payments were made, are shown in tables 16 and 17. The data have been assembled from published reports of the several agencies responsible for administering the programs, and comprise all payments made directly to farmers. Government aid which is reflected in the prices received by farmers for their products is not included since it is already covered in the estimates of cash receipts from farm marketings. The bonus paid to farmers for wheat delivered to the Commodity Credit Corporation during the second quarter of 1946 has also been treated as a price increase, and is included in cash receipts from farm marketings.

Government payments amounted to 769 million dollars in 1945 and 800 million dollars in 1946. These totals are only slightly different from those previously published. Farmers' total receipts from marketings and Government payments combined amounted to 22,295 and 25,323 million dollars respectively in 1945 and 1946.

Volume of production

In table 17, the index numbers of the volume of agricultural production for sale and consumption in farm households are revised for 1945 and 1946 in line with revisions in cash receipts. The all-commodity index for 1945 is one point higher than before, largely because of an upward revision in the index for poultry and eggs. For 1946, the revised index for all commodities is 136, 5 points higher than the figure last published (in the December issue of the Farm Income Situation), and equal to the record high established in 1944.

Present indications are that this record level of farm production will be maintained in 1947. The first preliminary estimates of this year's total production for sale and home consumption will appear in the July issue of the Farm Income Situation.

	:						

1/ Cattle and calves, hogs, sheep and lambs, and their products.

2/ Farm butter, cream, wholesale and retail milk.

3/ Chicken eggs, commercial broilers, other chickens, and turkeys.

4/ Includes wool and mohair in addition to commodity groups shown here.

5/ Wheat, rice, rye, and buckwheat.

6/ Corn, oats, barley, sorghums for grain, and hay.

7/ For fresh consumption: artichokes, asparagus, lima beans, snap beans, beets, cabbage, cantaloups, carrots, cauliflower, celery, cucumbers, eggplant, lettuce, onions, peas, peppers, spinach, tomatoes, and watermelons; for processing: asparagus, lima beans, snap beans, beets, cabbage, sweet corn, cucumbers, peas, spinach, and tomatoes.

8/ Potatoes, sweetpotatoes, and dry edible beans.

9/ Apples, peaches, pears, grapes, cherries, apricots, strawberries, cranberries, oranges, grapefruit, lemons, olives, dried figs, plums, dried prunes, almonds, walnuts, and pecans.

10/ Soybeans, peanuts, and flaxseed.

11/ Sugar beets, sugarcane for sugar, sugarcane syrup, sorgo syrup, and maple sugar and syrup.

12/ Includes cowpeas and hops in addition to commodity groups shown here.

Table 8.-Cash receipts from farming, by States, 1945
